CRA EVIDENCE READINESS PILOT

One defensible case. Four weeks. Fixed scope.

Join vulnerability, active workload, exposure and product context inside your environment - before an urgent decision becomes a manual evidence scramble.

EUR 7,500	4 weeks	1 day
fixed fee, excl. VAT	one product / environment	operator installation after readiness

What the pilot delivers

1. Customer-hosted deployment and named-user access.
2. Agreed scanner, Kubernetes, exposure and ownership sources.
3. Baseline for coverage gaps, unknown workloads and triage time.
4. Transparent priority using runtime, exposure and business context.
5. Executive and technical evidence package plus before/after readout.

Success is measured

Median triage time; unknown active workloads; exposed findings without an owner; coverage gaps; evidence-package preparation time.

Included scope

One product and one production environment; up to 500 active workloads; agreed connectors; OIDC/MFA when the identity provider is ready; weekly working session; final executive readout.

Commercial terms

50% at signature and 50% after final readout. Pilot license expires 35 days after activation and becomes read-only; existing evidence remains exportable.

Annual conversion

The full pilot fee may be credited to an annual subscription signed within 15 days, subject to the annual order form.

30-minute CRA evidence gap review **hello@cybermeasures.io**

CyberMeasures supports technical evidence preparation. It is not legal advice, a conformity assessment, a managed SOC, a penetration test or a determination that an event is reportable under the Cyber Resilience Act.
